

Improve your heavy-duty assembly operations.

The PS7KOL folding arm is a multi-purpose problem solver. It has a long reach and very large work space for its size.

It is useful for many types of assembly operations. Designed for tools and equipment up to 10 kg in weight and a maximum torque of 75 Nm.

Heavy-duty Parallel Arm

PA7KOL is a powerful parallel arm, capable of supporting weights up to 10 kg and torque up to 75 Nm.

It is intended for vertical operations and it is especially suitable for high-torque tightening processes.

Code	Model	Max Payload kg	Min Reach mm	Max Reach mm	Max Torque Nm
010600	PA2KOL	2,5	440	640	20
010602	PA7KOL	10*	500	950	75
010603	PS7KOL	10*	300	1000	75

** Required payload is to be specified with order*
