

Meet the first double output connector for transducerized screwdrivers

Cut purchase costs on transducerized tools

(1) KDS Screwdriver #1 (2) KDS Screwdriver #2 (3) KDU Control unit (4) Pin GND (5) Pin IN

Proudly introducing the first double output connector for transducerized screwdrivers in the market!

Kolver's unique DOCK05 will allow you to use two KDS screwdrivers with *just one KDU control unit* - this means you'll be able to cut costs dramatically by purchasing one control unit instead of two!

Whenever two KDS screwdrivers are meant to be used one at a time, a DOCK05 is the best solution to maximize productivity at the lowest possible cost.

- **Unique product** - the first ever double output connector for transducerized tools in the market!
- **Cut K-Ducer purchase costs by 40%**
- Fully compatible with KDU-1 and KDU-1A – get the most out of your K-Ducer system
- Instant tool recognition
- Set up to 32 different programs for each screwdriver
